

“Follow the child.”

Journey & Discovery

What does my child do all day in the Montessori classroom?

For most parents, Montessori is vastly different from our own educational experience. So naturally, we have many questions. For some the questions are simple: “What is a metal inset? What do they do with a checkerboard?” For others the questions are more profound: **Where should my child go to school?** Should they continue in Montessori as they reach the next step in their education?

The only way to answer these questions and to know what school is right for your child is to do some thorough research. Here is your opportunity to do so...

MIR and Grove Farm and High School are hosting the semiannual *Journey & Discovery* to help you answer these questions. This full-day seminar offers a comprehensive look at Montessori education from toddlers to teenagers.

The day starts with a **journey** through classrooms spanning the entire Montessori curriculum from 18 months to 18 years to get a feel for the Montessori prepared educational environment. Parents will then split into the group of their choice to fully **discover** the curriculum for ages 18 months to 6th grade, or 1st grade through 12th grade. This second half will include hands-on learning and an opportunity to talk with teachers at all levels about what happens in the classroom each day.

If you have questions about how a Montessori education compares with conventional education, or if you want to understand what your child does each day, **this parent event will give you those insights like no other.**

When Saturday,
Nov 7, 8 AM–2 PM

Where Montessori
in Redlands

Lunch Will be
served

Child care Avail-
able for enrolled
students ages 3
and older for \$25
(limit 12)
